

FHIR Layer EXchange (FLEX) Release Notes

Release #: 3.11

Release Date: July 9, 2024

What's New with this Release

A. Access Management

1. Admin Portal

- a. No new enhancements for this release.

2. Vendor Portal

- a. No new enhancements for this release.

3. Member Portal

- a. No new enhancements for this release.

4. Authorization/Authentication

- a. No new enhancements for this release.

B. Framework

1. FLEX Server

- a. No new enhancements for this release.

C. Patient Access APIs

1. Claims

- a. No new enhancements for this release.

2. Clinical

- a. In preparation to implement the \$Patient-everything operation, new _lastUpdated search parameters were added to the Coverage and MedicationRequest resources as those parameters will be a pre-requisite for the _since search parameter in the \$Patient-everything operation. Additional work will be required on the patient access resources when clinical data sources are aligned to ECDH.
- b. New clinical data listeners for resource profiles that FLEX did not already support were implemented to enable the ingestion process of member clinical data for the Payer-to-Payer capability. These profiles include CareTeam, CarePlan, DiagnosticReport, Goal, Device, AllergyIntolerance, and DocumentReference.
- c. As part of the CMS and California mandate for Payer-to-Payer Data Exchange, a group resource was created to be used in the member attribution and consent management process. This will allow individual members to be assigned to a group of members as defined by the member attribution list.

3. Formulary (Plan/Member)

- a. No new enhancements for this release.

D. Public Directory APIs

1. Provider Directory

- a. No new enhancements for this release.

2. Formulary Directory

- a. No new enhancements for this release. .

Defect Fixes in this Release

1. No defect fixes for this release.
