

Facility Response to Quality Information

For California Facilities Only

Individual facilities or health care providers may disagree with the methodology used to define the cost ranges, the cost data, or quality measures. Many factors may influence cost or quality, including, but not limited to, the cost of uninsured and charity care, the type and severity of procedures, the case mix of a facility, special services such as trauma centers, burn units, medical and other educational programs, research, transplant services, technology, payer mix, and other factors affecting individual facilities and health care providers.

Pursuant to Section 1367.49 of the California Health and Safety Code and Section 10133.64 of the California Insurance Code, a provider or supplier may choose to provide an Internet Web link where a response to the health care service plan's cost and/or quality posting may be found.

This page contains the Internet Web links received in response to the data displayed in programs UHC utilizes to identify and recognize hospitals that meet certain guidelines including, but not limited to, providing safe, timely, effective and efficient quality care.
